AFTER-SALES WARRANTY POLICY

For OEM/ODM Partners - Guangzhou New View Electrical & Lighting Co., Ltd.

B2B claims are handled without physical return shipping to China. The factory warranty covers manufacturing defects.

01 WARRANTY COVERAGE

Standard warranty: 2 years from the date of shipment.

Exceptions: E9 headlight bulbs and S0515B/G work lights carry 18 months from shipment. All other models carry 2 years.

Scope: manufacturing defects in materials, workmanship and assembly. Target defect rate: below 1%.

Retail warranty to end customers is handled by the brand owner or distributor.

02 CLAIM PROCESS - DEFECT RATE BELOW 2%

1. Prepare the unit: your technician removes it from the vehicle and cuts the defective unit's power lead on the workbench. Do not cut the vehicle wiring.
2. Photograph: show the cut lead, the product serial number and any visible external defect.
3. Submit: email the photo and a brief fault description to international@mynvel.com.
4. Verification: NVEL reviews the evidence and responds within 48 hours.
5. Resolution: verified claims are credited on the next invoice, or replacement units ship with the next bulk order. Your choice.

03 BATCH REVIEW AND INVESTIGATION

At a 2% defect rate, the batch is flagged for review. At 5%, a full batch-failure investigation is opened.

NVEL engineering provides remote diagnostics before a decision on batch credit or replacement. Confirmed manufacturing defects are resolved for the verified defective quantity.

04 INCLUDED SPARE-PARTS BUFFER

Every bulk purchase order includes a 1-2% spare-parts buffer, supplied with the main shipment to support the first local warranty replacements.

Verified claims are handled through the normal credit or replacement process described above.

05 NOT COVERED

Incorrect installation, including over-tightened screws, incorrect wiring or modified mounting.

Physical damage, including transit damage; damage outside the published operating specifications.

Operation beyond rated voltage, water ingress caused by damaged seals, normal wear and cosmetic degradation.
